

PRE-SEED · FLIGHT MONITORING · TELEGRAM ALERTS

Fly456

You set origin, destination, dates and max price.
We monitor flights and notify you on Telegram - so you can book fast.

Two products: Economy cabin · Business cabin

Asking: ~150k EUR pre-seed · fly456.com · @fly456bot

Emiliano Tichauer · Founder

PROBLEM

Good fares disappear before travelers can act

- Flight prices move in hours. Checking sites manually is slow and easy to miss.
- Generic deal feeds are noisy - they are not your route, dates or budget.
- By the time you see a fare, seats and price are often already gone.

SOLUTION

Named monitoring + Telegram alert to book fast

You define the flight

Origin
Destination
Dates
Maximum price

Fly456 watches that exact brief.

We notify on Telegram

Alert in your Telegram inbox
via @fly456bot
Built to help you reserve fast
before the fare moves again

We do not sell tickets.

Two cabin products

Economy - economy cabin
Business - business cabin

Same alert logic,
different cabin.

PRODUCT

Economy and Business - same monitoring, different cabin

Fly456 Economy

Monitors economy-cabin opportunities

Alert = origin + destination + dates + max price

Telegram notification when a match appears

For leisure / price-sensitive travelers

Fly456 Business

Monitors business-cabin opportunities

Same named criteria, business fares

Telegram notification to book fast

For premium-cabin travelers waiting
for the right price window

TRACTION & MODEL

Replace brackets with live numbers before sending

Traction

Product live: fly456.com + @fly456bot
