

NextConvers

AI B2B lead scoring & prospecting before outreach begins.

This deck covers every Hub71 required point:

- | | |
|---------------------------------|----------------------------------|
| 1. Problem | 6. Traction |
| 2. Solution / value proposition | 7. Founding team |
| 3. Business model | 8. Previous and next fundraising |
| 4. Competition | 9. Plans for Hub71 and Abu Dhabi |
| 5. Market | |

Confidential · nextconvers.com · Parvus Media S.L.U.

1. PROBLEM

Sales teams waste outreach on the wrong people

- B2B outbound volume is rising, but reply and acceptance rates keep falling.
- CRMs and sequencers move leads - they do not decide who deserves attention first.
- Teams scrape lists, buy contacts, and spray messages without ICP affinity scoring.
- Result: burned domains, wasted SDRs, and pipeline full of low-fit noise.

The gap in the stack

Outreach tools send. CRMs store. Ads generate form fills.

Almost nothing decides - before first contact - who is actually worth a conversation.

That missing decision layer is where NextConvers sits.

2. SOLUTION / VALUE PROPOSITION

AI decision layer before outreach - more conversations with buyers

- Solution: identify and prioritize B2B prospects by role, seniority, company, industry and geo fit.
- Each profile gets a clear 1-5 star affinity score: who to contact, in what order, before outreach.
- Sync scored leads via webhooks into CRM and outreach tools - no change to existing workflows.
- We do not send messages. We make outreach smarter before it starts.

Value proposition

NextConvers is the step before outreach: plug-and-play ICP scoring for sales, growth and agencies, feeding tools they already pay for (CRM, sequencers) so teams talk to people who can actually buy.

3. BUSINESS MODEL

SaaS usage + seats, expandable into MENA enterprise

- Core: subscription / usage-based SaaS for scored prospects delivered into the sales stack.
- Expansion: agency plans, multi-account workspaces, higher-volume ICP scoring.
- Upsell path: PLG reports (DataForMedia) to enterprise decision layer (NextConvers).
- GTM: product-led entry + demos for mid-market / enterprise sales orgs.

Revenue logic

Recurring SaaS (seats / volume).

Land with one team, then expand org-wide.

Low implementation cost, fast sales cycle.

High switching cost once embedded in CRM.

Unit economics focus

Gross margin typical of AI SaaS.

CAC via outbound + partners + PLG.

Payback driven by SDR productivity.

MENA enterprise ACV upside via Hub71.

4. COMPETITION

We sit before outreach - not instead of it

	NextConvers	Enrichment (Apollo/ZoomInfo)	Sequencers (Smartlead etc.)	CRM
Scores who to contact first	Yes	Partial	No	No
Sends messages	No	No / limited	Yes	No
Feeds existing stack	Yes	Export	Native	System of record
ICP affinity 1-5 stars	Core	Filters	No	Custom fields
Time-to-value	Minutes	Days	Days	Weeks

Moat: decision layer + workflow lock-in via sync + scoring tuned on conversion feedback (not only static firmographics).

5. MARKET

Sales intelligence in a large, expanding B2B stack

- TAM: global sales engagement + revenue intelligence software (multi-billion USD category).
- SAM: mid-market & enterprise B2B teams that already buy CRM + sequencers + enrichment.
- SOM (near-term): EU outbound teams + GCC expansion with Abu Dhabi as regional HQ.
- Why now: AI scoring becomes table stakes; buyers reject spray-and-pray; professional signals are richer.

Why Abu Dhabi / GCC matters

High-ticket B2B sales across banking, telecom, energy, government and holding groups.

Hub71 partners (banks, etisalat/e&, Microsoft, AWS, VCs) are natural design partners and buyers.

Parvus Media already has a Dubai footprint - Abu Dhabi becomes the scale HQ for NextConvers.

6. TRACTION

Product live · early commercial · domain proof

Product & GTM traction

- Live product at nextconvers.com
- Clear ICP: B2B sales, growth, agencies
- Integrations path: CRM + outreach webhooks
- Adjacent PLG wedge live: DataForMedia (LinkedIn audience intelligence)
- Demo-led motion for enterprise teams

BEFORE SUBMIT - replace with:

paying logos · MRR/ARR · pilots · waitlist

Operating proof behind the product

- Parvus Media since 2013 (AdTech, data, performance)
- Clients across Europe, LatAm, Middle East
- Offices: Madrid & Dubai footprint
- Same team DNA: signals -> decisions for commercial teams

Traction thesis: AdTech operators shipping an AI sales-intelligence SaaS, not a slide-only startup.

7. FOUNDING TEAM

Operator-builders with AdTech & B2B data DNA

Emiliano Tichauer - Founder & Product Lead, NextConvers

- Founder & Product Lead at NextConvers
- Partner / advisor at Parvus Media (AdTech & performance products since 2013)
- 20+ years building media, data and commercial products across Europe, LatAm and Middle East
- Prior ventures: Wolly (local biz SEO), CULSION, Culturalia European Hispanics
- Based Madrid; Parvus Media footprint includes Madrid & Dubai
- Commitment: at least one founder relocates long-term to Abu Dhabi and builds the local team

Abu Dhabi hiring plan (year 1): commercial lead (GCC) + AI/engineering hire + Hub71 partner GTM.

BEFORE SUBMIT: add co-founders / key hires with LinkedIn if available.

8. PREVIOUS AND NEXT FUNDRAISING

Bootstrapped to date · Hub71 SAFE now · seed after

Previous fundraising

- No institutional round yet
- Bootstrapped / founder-funded
- Product built without VC
- Parvus Media ops funded early R&D and GTM learning

Status: pre-seed / Access-stage company seeking first structured capital via Hub71 SAFE.

This round (Hub71 Access)

- AED 250,000 cash via SAFE
- AED 250,000 in-kind incentives
- Optional top-up +AED 250,000 for equity after strong year

Use of funds (12 months):

- Founder relocate + AD team
- MENA corporate pilots
- AI scoring depth
- ADGM / visas / ops

Next fundraising

- Target: seed / pre-A after Access + Demo Day
- Timing: ~12 months (post Hub71 KPIs)
- Investors to engage: MEVP, Shorooq, Global Ventures, UAE Angels, Hub71 capital partners
- Goal: scale MENA + EU GTM with proven lift

9. PLANS FOR HUB71 AND ABU DHABI

Abu Dhabi as MENA HQ for AI sales intelligence

- Relocate at least one founder long-term to Abu Dhabi and hire locally within year one.
- Operate via ADGM-friendly setup using Hub71 licensing, visa, housing and office support.
- Run 3-5 corporate / agency pilots with Hub71 market partners (banks, telco, enterprise SaaS).
- Complete the Techstars-powered guided track; prepare fundraising showcase and Demo Day.
- Use Hub71 capital network for the next (seed / pre-A) round after proving MENA traction.

12-month KPIs (draft)

- Live AD entity + local team nucleus
- ≥ 3 paid MENA design partners
- Scoring / reply-rate lift proven
- Pipeline to seed / pre-A after Demo Day

Why Hub71 specifically

- Sector-agnostic Access + AI narrative
- Corporate distribution into GCC buyers
- SAFE + in-kind de-risks market entry
- Dubai presence to Abu Dhabi scale HQ

CLOSING ASK

Join Hub71 Access - scale NextConvers from Abu Dhabi

We are applying for

Hub71 Access Programme (Cohort 20) - 12 months starting February 2027.

Package: AED 250,000 cash via SAFE + AED 250,000 flexible in-kind incentives.

Commitment: founder relocation long-term + building the NextConvers team out of Abu Dhabi.

Ambition: become the default AI decision layer before outreach for B2B teams across MENA & beyond.
