

HUB71 ACCESS PROGRAMME · COHORT 20 · APPLICATION PITCH

NextConvers

AI B2B lead scoring & prospecting
before outreach begins.

We identify the right people, score them 1-5 by ICP fit,
and sync prioritized prospects into CRM & outreach tools.

Confidential · nextconvers.com · Parvus Media S.L.U.

PROBLEM

Sales teams waste outreach on the wrong people

- B2B outbound volume is rising, but reply and acceptance rates keep falling.
- CRMs and sequencers move leads — they do not decide who deserves attention first.
- Teams scrape lists, buy contacts, and spray messages without ICP affinity scoring.
- Result: burned domains, wasted SDRs, and pipeline full of low-fit noise.

The gap in the stack

Outreach tools send. CRMs store. Ads generate form fills.

Almost nothing decides — before first contact — who is actually worth a conversation.

That missing decision layer is where NextConvers sits.

SOLUTION

The decision layer before outreach

- NextConvers finds and prioritizes B2B prospects using role, seniority, company, industry and geo fit.
- Each profile gets a clear 1-5 star affinity score so teams know who to contact, in what order.
- Scored leads sync via webhooks into CRM and outreach tools — no change to existing workflows.
- We do not send messages. We make outreach smarter before it starts.

01 Identify

Source people who match the ICP from professional and engagement signals.

02 Score

Rank affinity 1-5 stars by role, experience, company size, industry and geo.

03 Sync

Push prioritized leads into CRM / sequencers daily so SDRs work the best first.

VALUE PROPOSITION

More conversations with people who can buy

+40%

team effort

Who wins

B2B sales & SDR teams · Growth / RevOps · Founders doing outbound · Agencies running prospecting at scale.

Plug & play: minutes to start, not weeks. Flexible SaaS — pay for usage, no long lock-in.

Positioning: “NextConvers is the step before outreach.” We fuel tools teams already pay for.

PRODUCT

AI scoring that sales teams actually use

Affinity engine

Role & seniority
Company attributes
Industry + geo fit
1-5 star prioritization

Integrations

Webhooks to CRM
Outreach sequencers
CSV / API export
Paid media audiences

Team UX

Minutes to onboard
Shared team insights
Agency multi-account
No technical project

BUSINESS MODEL

SaaS usage + team seats, expandable into MENA enterprise

- Core: subscription / usage-based SaaS for scored prospects delivered into the sales stack.
- Expansion: agency plans, multi-account workspaces, higher volume ICP scoring.
- Upsell path: from PLG data reports (DataForMedia) to enterprise decision layer (NextConvers).
- GTM: product-led entry + demos for mid-market / enterprise sales orgs.

Revenue logic

Recurring SaaS (seats / volume).

Land with one team, then expand org-wide.

Low implementation cost, fast sales cycle.

High switching cost once embedded in CRM.

Unit economics focus

Gross margin typical of AI SaaS.

CAC via outbound + partners + PLG.

Payback driven by SDR productivity.

MENA enterprise ACV upside via Hub71.

MARKET

Sales intelligence sits in a large, expanding B2B stack

- TAM: global sales engagement + revenue intelligence software (multi-billion USD category).
- SAM: mid-market & enterprise B2B teams that already buy CRM + sequencers + data enrichment.
- SOM (near-term): Spanish / EU outbound teams + GCC expansion via Abu Dhabi as regional HQ.
- Why now: AI scoring becomes table stakes; buyers reject spray-and-pray outbound; LinkedIn & professional signals are richer than ever.

Why Abu Dhabi / GCC matters

High-ticket B2B sales culture across banking, telecom, energy, government and holding groups.

Hub71 partners (banks, etisalat/e&, Microsoft, AWS, VCs) are natural design partners and buyers.

Parvus Media already operates with a Dubai footprint — Abu Dhabi becomes the scale HQ for NextConvers.

COMPETITION

We sit before outreach — not instead of it

	NextConvers	Enrichment (Apollo/ZoomInfo)	Sequencers (Smartlead etc.)	CRM
Scores who to contact first	Yes	Partial	No	No
Sends messages	No	No / limited	Yes	No
Feeds existing stack	Yes	Export	Native	System of record
ICP affinity 1-5 stars	Core	Filters	No	Custom fields
Time-to-value	Minutes	Days	Days	Weeks

Moat thesis: decision layer + workflow lock-in via sync + proprietary scoring tuned on real conversion feedback loops (not just static firmographics).

TRACTION & FUNDS RAISED

Product live · early commercial · bootstrapped

Traction (current)

- Live product at nextconvers.com
- Clear ICP: B2B sales, growth, agencies
- Integrations path: CRM + outreach webhooks
- Adjacent PLG wedge live: DataForMedia (LinkedIn audience intelligence)
- Domain proof via Parvus Media (since 2013)
 - AdTech, data, performance, MENA clients

BEFORE SUBMIT — replace with:

paying logos · MRR/ARR · pilots · waitlist

Funds raised

- Bootstrapped to date (founder-funded)
- Seeking Hub71 Access package:
AED 250k cash (SAFE) + AED 250k in-kind
- Eligible top-up: +AED 250k for equity
after strong 12-month performance

Use of funds (12 months):

- MENA GTM + corporate pilots
- Scoring / AI product depth
- Founder + first Abu Dhabi hires
- Compliance / ADGM setup support

FOUNDERS / FOUNDING TEAM

Operator-builders with AdTech & B2B data DNA

Emiliano Tichauer — Founder & Product Lead, NextConvers

- Founder & Product Lead at NextConvers
- Partner / advisor at Parvus Media (AdTech & performance products since 2013)
- 20+ years building media, data and commercial products across Europe, LatAm and Middle East
- Prior ventures: Wolly (local biz SEO), CULSION, Culturalia European Hispanics
- Based Madrid; Parvus Media footprint includes Madrid & Dubai — ready to commit a founder long-term to Abu Dhabi to build the NextConvers team locally

Team build plan in Abu Dhabi: commercial lead (GCC) + AI/engineering hire + shared GTM with Hub71 partners.

BEFORE SUBMIT: add full-time co-founders / key hires with photos and LinkedIn if available.

PLANS FOR HUB71 & ABU DHABI

Abu Dhabi as MENA HQ for AI sales intelligence

- Relocate at least one founder long-term to Abu Dhabi and hire locally within the first programme year.
- Incorporate / operate via ADGM-friendly setup with Hub71 licensing & visa support.
- Run 3-5 corporate / agency pilots with Hub71 market partners (banks, telco, enterprise SaaS).
- Use Techstars-powered guided track for fundraising readiness and Demo Day.
- Connect with capital partners (MEVP, Shorooq, Global Ventures, UAE Angels, etc.) for post-SAFE round.

12-month KPIs (draft)

- Live AD entity + local team nucleus
- ≥3 paid MENA design partners
- Scoring accuracy / reply-rate lift proven
- Pipeline to seed / pre-A after Demo Day

Why Hub71 specifically

- Sector-agnostic Access + AI narrative
- Corporate distribution into GCC buyers
- SAFE + in-kind de-risks market entry
- Dubai presence to Abu Dhabi scale HQ

THE ASK

Join Hub71 Access — scale NextConvers from Abu Dhabi

We are applying for

Hub71 Access Programme (Cohort 20) — 12 months starting February 2027.

Package: AED 250,000 cash via SAFE + AED 250,000 flexible in-kind incentives.

Commitment: founder relocation long-term + building the NextConvers team out of Abu Dhabi.

Ambition: become the default AI decision layer before outreach for B2B teams across MENA & beyond.
